

Recycling and the Consumer

Bothersome, hassle, not worth my time, I'm too busy. Sound like thoughts running through your head when it comes to recycling? When that happens, STOP! Just remember, YOU make a difference.

By taking a few seconds to recycle materials the right way, YOU are helping the environment, saving our landfill space, cleaning up our community and making this program better for yourself and your fellow residents and businesses.

Use this brochure before you put something into either your recycling container or your garbage can. Keep in mind, recycling will be most effective when we understand *recyclable material* from *non-recyclable material*.

Every little bit of recycling helps to save our world! Your effort makes a difference!

Remember, do your part no matter how big or small! Even if you only recycle a few items a week, your effort makes a difference! YOU make recycling work!!

KEEP IT UP!!
